

23rd of April 2012

Dear 

I was amazed to find out from  that you had called her last Sunday and unraveled a series of slanderous phrases concerning me.  recalls you saying that I was a psychopath, completely crazy (repeated several times), that I was a person having problems all the time with the justice, that I was harassing my mother and sister in Alicante, that I was mentally sick, that I was despicable and that you would proceed to "porter plainte" if I did not stay away from my mother's house. I was very hurt and sad by your cruel words.  is not at all involved in my problems and thinks that it is only correct that she does not mix to avoid making things worse. I do not know how you have the supernatural powers to evaluate what happened to  and me in Alicante while you were here in Geneva. I should remind you that I had just arrived at my mother's house and  immediately called the police to throw me out. As you know the house belongs to my mother and she is always delighted to see me.

You are a prominent psychiatrist and you know full well that Isabelle is not very stable as on several occasions she has consulted a psychiatrists for help. I thought that in all these years you could have given her some help to bring out of her suffering. From your sudden outburst I understand that you and  have encouraged  to act recklessly in Alicante and that you blindly support her. It has been at least 8 years that we have not spoken to each other since the day that  decided to stop speaking to me for some reason that he will never divulge to me. I think that today we should start by renewing the dialogue and think that it is only correct that you write me a letter of apology for your slanderous accusations. I think that a 2nd of May deadline would be a very nice day to receive your letter of apology.
